

THE TORR.5
HIGHLIGHTS

TORR.5

FORM & FUNCTION

Lighting at its finest. The TORR.5 is a sleek and modern luminaire that utilizes the same integrated anidolic light-guide-technology, into opposing wedge profiles, as the AX.5. The TORR.5 reduces glare while creating a luminaire that appears smaller than its dimensions; all without the harshness that is typically associated with smaller apertures. Available in Pendant Direct, Pendant Indirect, and Spoke Center Hub.
